

Saverio Niccolini received his “Laurea” degree in telecommunications engineering from the University of Pisa in 2000. He is presently a Ph. D. student with the Telecommunications NetGroup Laboratories at the University of Pisa where he is also a Teaching Assistant. His research interests include voice over IP, next generation networks architectures, QoS traffic engineering and performance evaluation. Currently he is involved in the “MOICANE” EU research project (“Multiple Organization Interconnection for Collaborative Advanced Networks Experiments”) and in the “NEBULA IP” MURST research project (“Network Engineering Beyond User-domain service Level Agreement in IP domains”).
